Cambridge, MA | (555) 382-9104 | alex.morgan@alumni.harvard.edu | linkedin.com/in/alexmorgan | github.com/alexmorgan

EDUCATION

HARVARD UNIVERSITY *Cambridge, MA*

Bachelor of Arts in Computer Science, Secondary in Economics May 2023

- Cumulative GPA: 3.88 / 4.00 (Magna Cum Laude, Dean's List all semesters)
- Relevant Coursework: Systems Programming, Algorithms & Data Structures, Machine Learning, Distributed Systems

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL (PostgreSQL), C++, HTML5/CSS3

Frameworks: FastAPI, React, Node.js, Polars, Pandas, Pydantic, PyTorch, TailwindCSS

Tools & Cloud: Git, GitHub Actions (CI/CD), Docker, Supabase, AWS (S3, EC2), Linux, Postman

PROFESSIONAL EXPERIENCE

NEXUS DATA SYSTEMS *June 2023 - Present*

Software Engineer - AI & Backend Infrastructure *Boston, MA*

- Architected and deployed asynchronous REST APIs using FastAPI and Python, handling 150,000+ daily queries with sub-50ms latency.
- Integrated LLM extraction pipelines using Google Gemini API and Pydantic schemas, reaching 99.4% data validation accuracy.
- Engineered high-speed dataframes with Polars for batch CSV parsing in RAM, decreasing execution times by 68%.
- Implemented automated CI/CD workflows and containerized services using Docker, maintaining 94% test suite coverage.

VERTEX ANALYTICS *June 2022 - August 2022*

Software Engineering Intern - Platform Team *New York, NY*

- Designed responsive dashboard interfaces in React and TypeScript for recruitment analytics, improving workflow speed by 25%.
- Optimized complex PostgreSQL queries and Supabase indexes, decreasing median search query latency from 420ms to 85ms.
- Participated in Agile engineering sprints, performing rigorous code reviews and implementing unit tests.

PROJECTS

SMART ATS & RESUME PARSER *Python, FastAPI, Polars, React, Gemini SDK*

- Engineered an applicant tracking platform filtering candidates by experience thresholds and calculating match scores.
- Built an intuitive user interface with drag-and-drop file upload and instant structured evaluation breakdown.

SEMANTIC EMBEDDING SEARCH ENGINE *Python, PyTorch, Supabase pgvector, Docker*

- Developed a high-throughput search system vectorizing and indexing 50,000+ candidate profiles with cosine-similarity matching.

LEADERSHIP & ACTIVITIES

HARVARD COMPUTER SOCIETY *September 2021 - May 2023*

Vice President of Technical Workshops *Cambridge, MA*

- Organized and instructed 12 technical bootcamps on full-stack web architectures and cloud deployment for 200+ students.
